

LOW CARBON AGRICULTURE CONSORTIUM

Together, for a low-carbon agriculture

Genesis of Low Carbon Agriculture Consortium

The aim of the Low Carbon Agriculture Consortium is to promote a broad and coherent international offering of French products and services that reduce the carbon footprint of crop and livestock productions.

It gathers French suppliers of agricultural products and services working together to contribute to a more sustainable agriculture internationally.

Initiated by Fabien ARIGNON (Sitia) and Olivier CLECH (Nor-Feed), it is organized into 2 groups : crop production and animal production.

The initial founders are Sitia, Nor-Feed, Burel, Valorex, Naotec, Cooperl and Mg2mix.

Together, for a low-carbon agriculture

Objectives of the consortium

Promote a broad and coherent range of products and services on the international services that reduce the carbon footprint of plant and animal animal production

- **Boost the visibility of everyone at trade fairs**
- **Share sales leads**
- **Gain access to international projects such as Fasep**

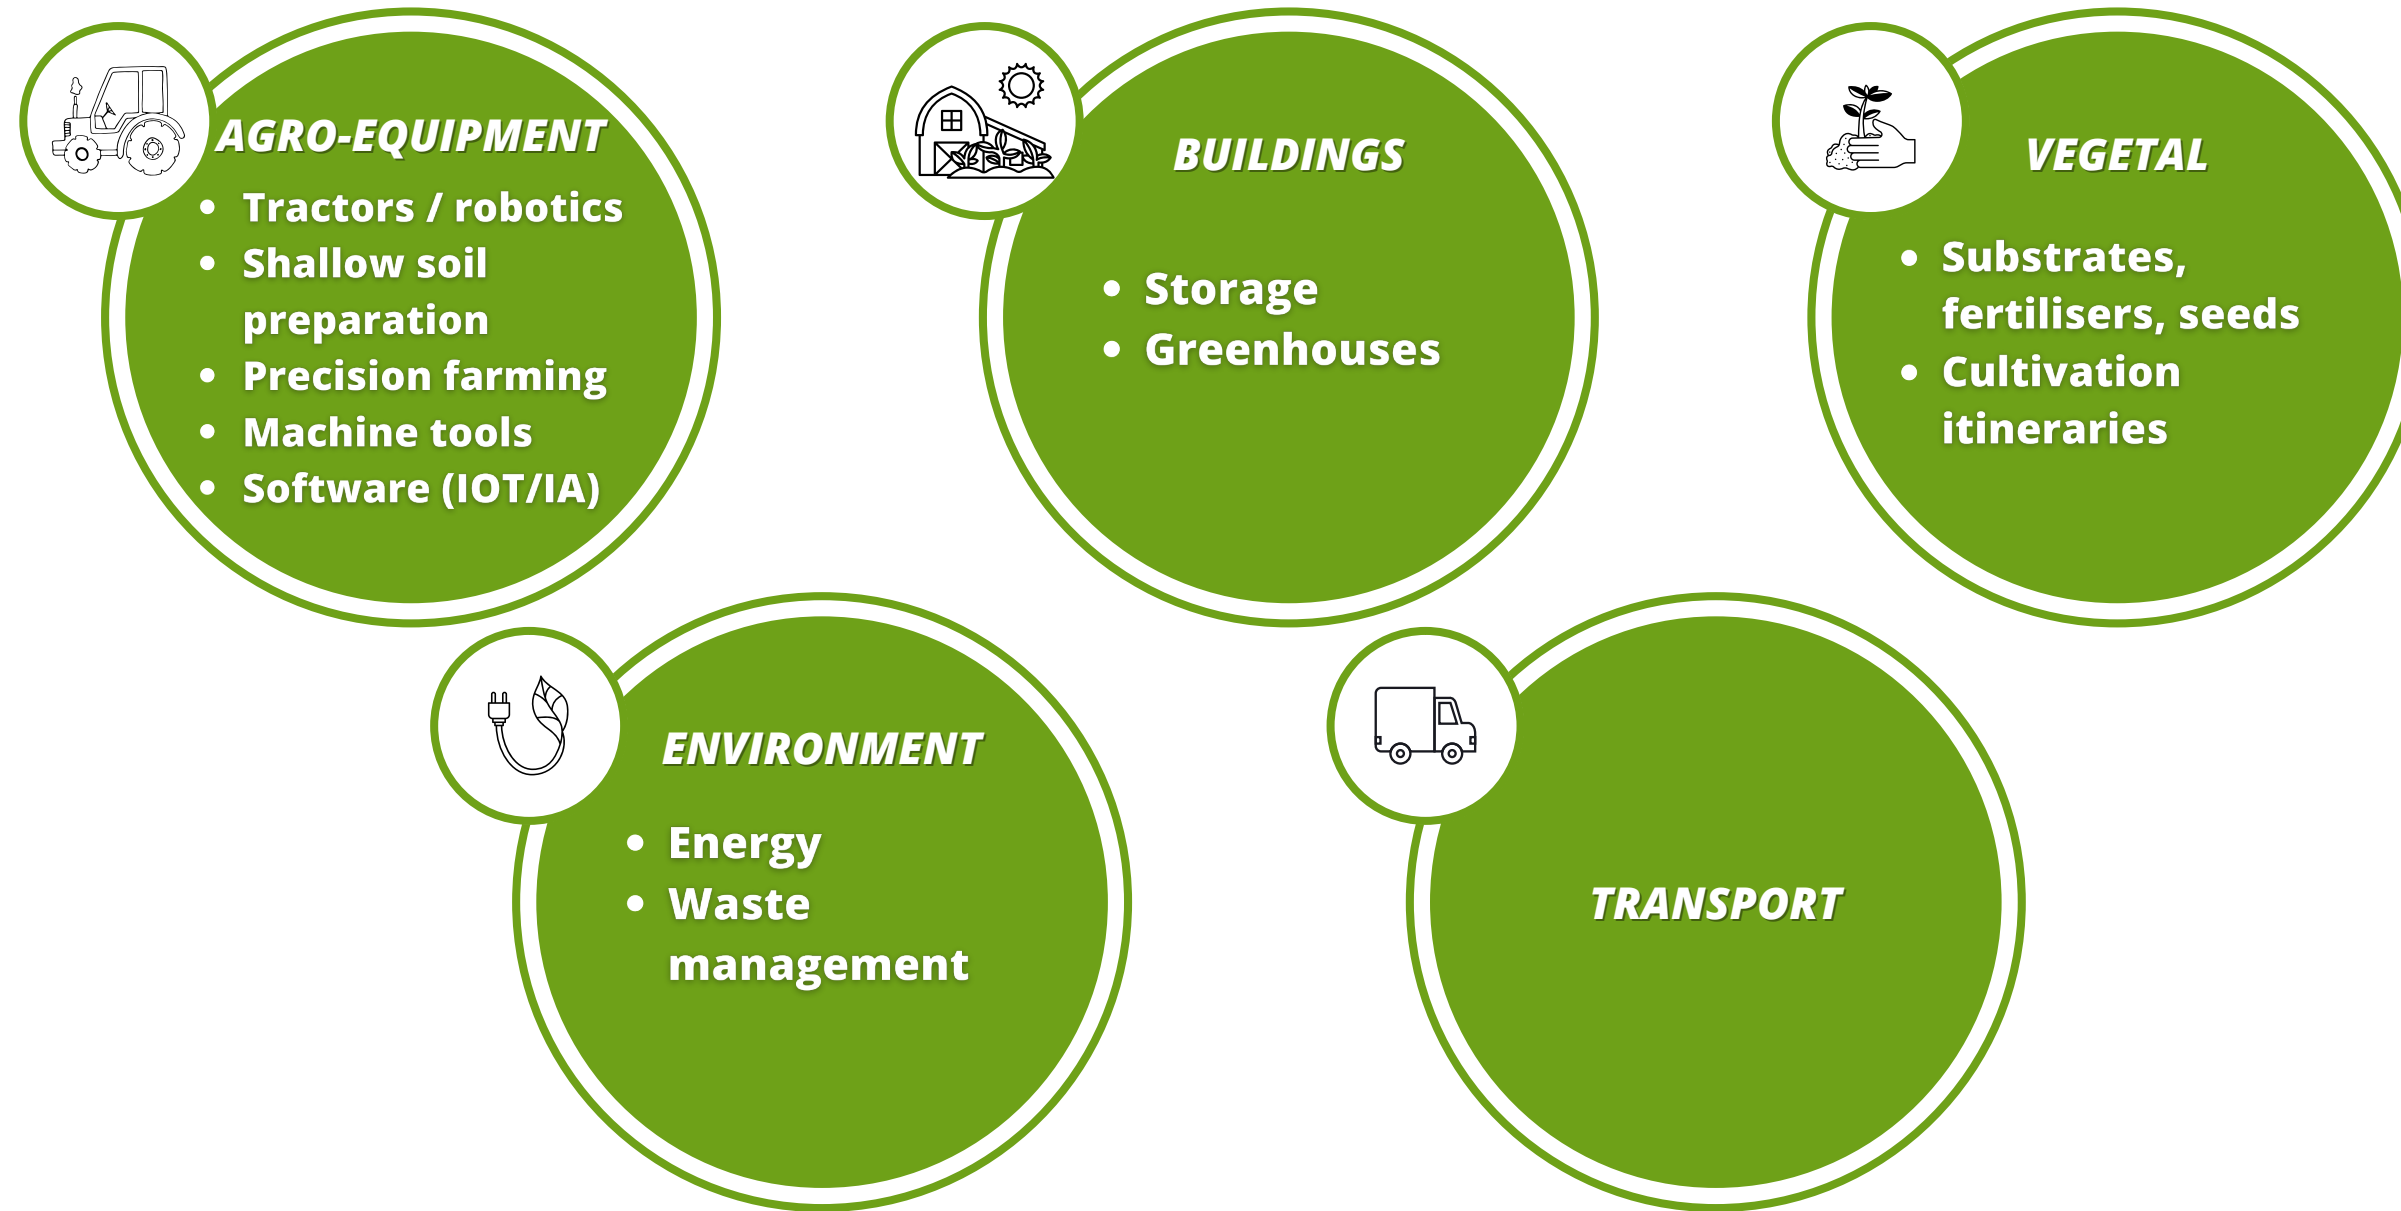

Building and promoting decarbonisation expertise to stay ahead of the competition

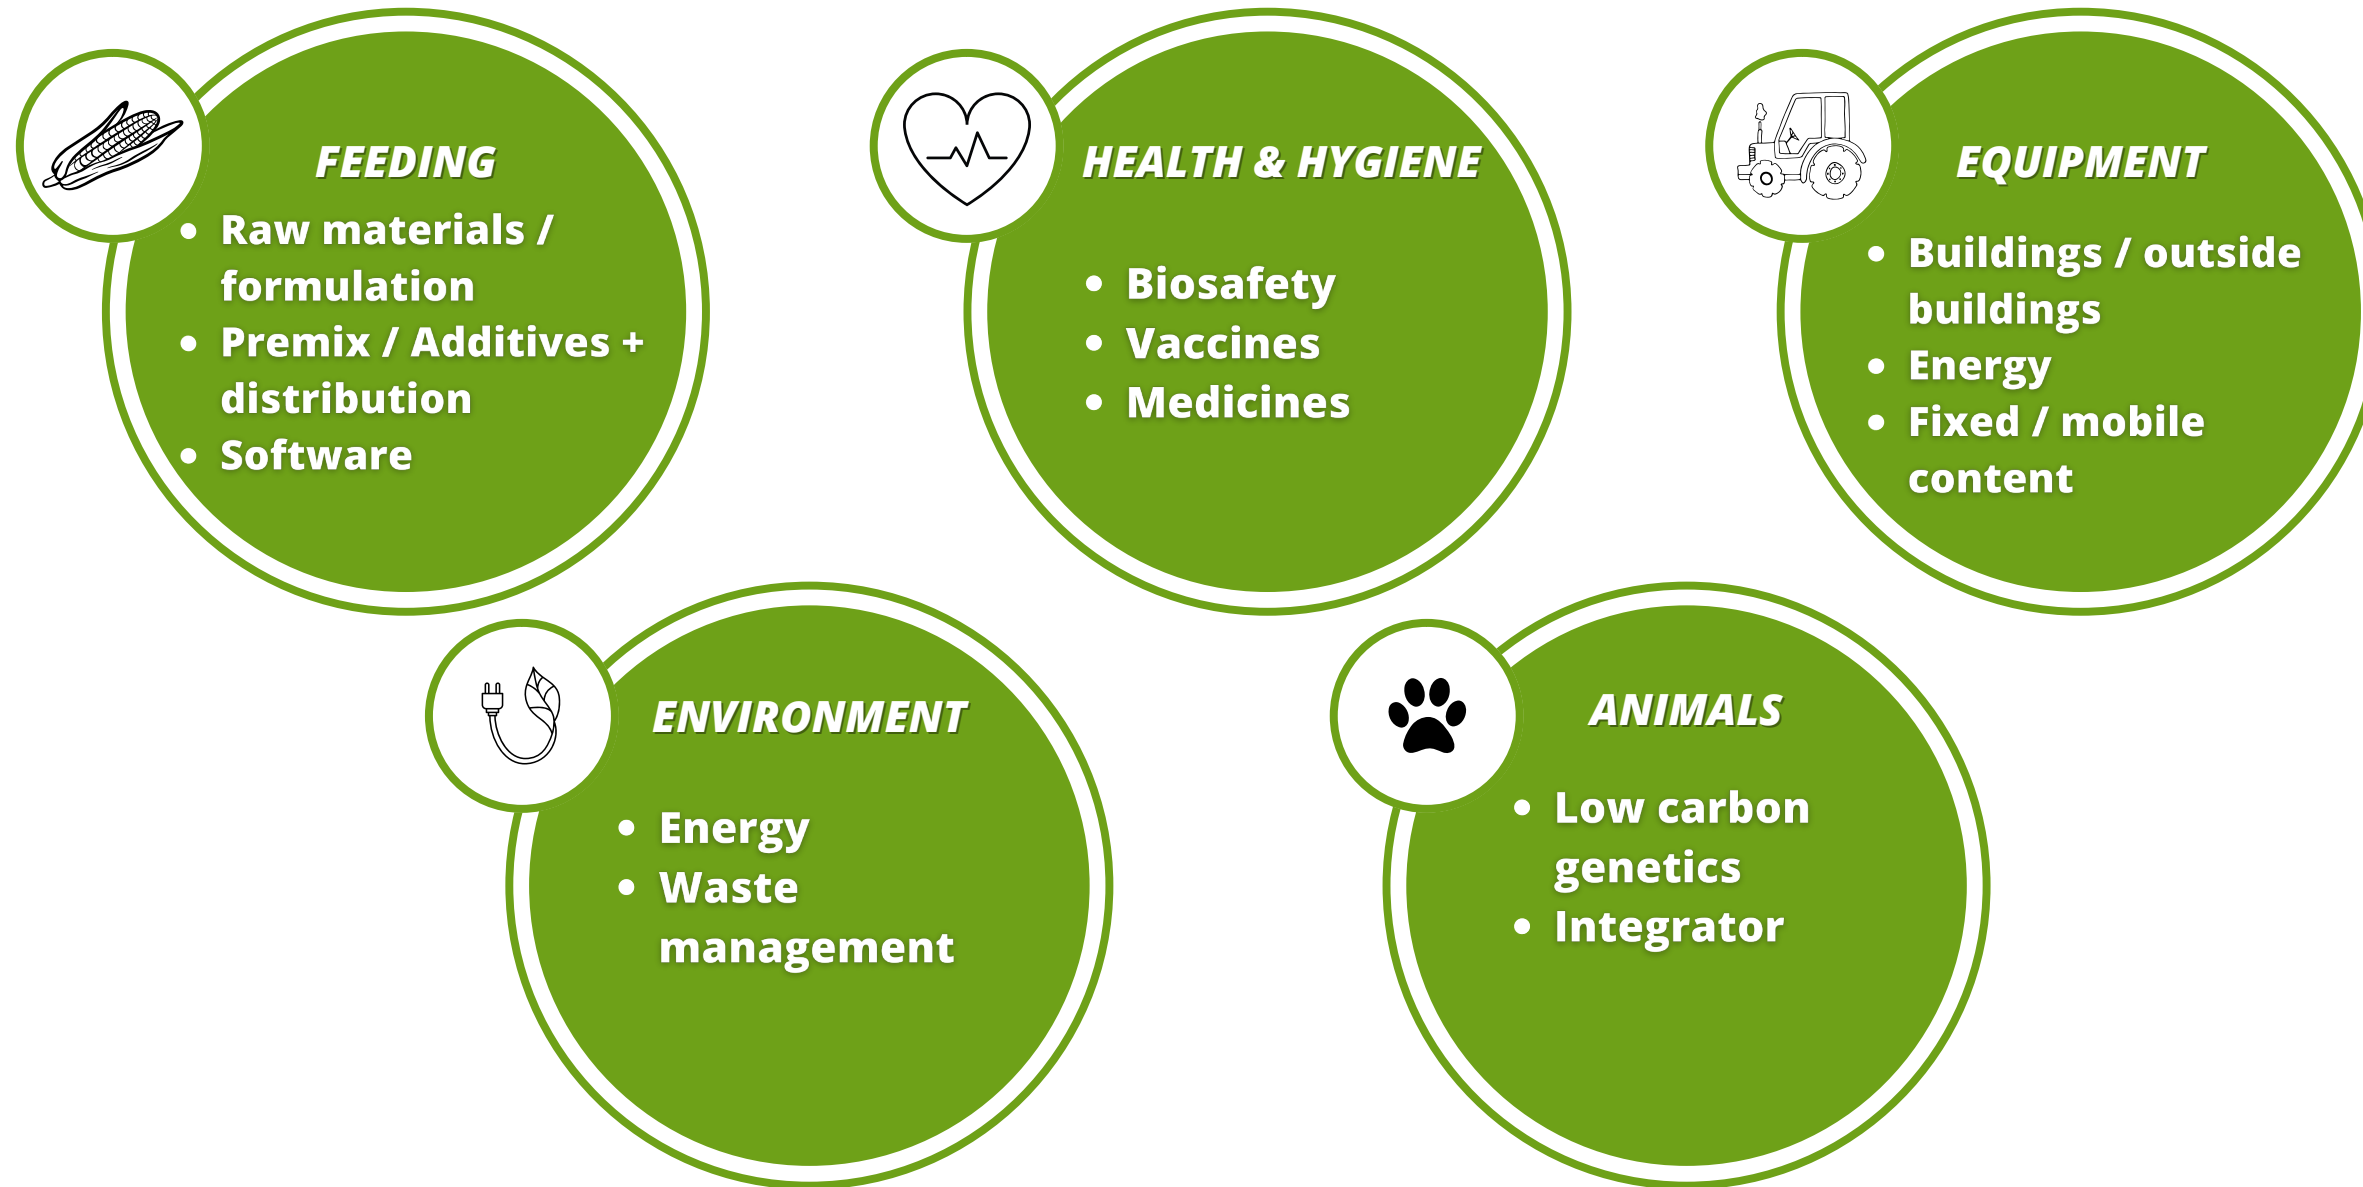

Together, for a low-carbon agriculture

Plant production division

Animal production division

Low-carbon solutions

3 areas of decarbonation identified:

**REDUCTION OF
CHEMICAL INPUTS/
CO2 SEQUESTRATION**

**CIRCULAR
ECONOMY /
WASTE RECOVERY**

**ENERGY
REDUCTION**

**REDUCTION OF
GREENHOUSE GAS
EMISSIONS**

Operating rules

- Confidentiality
- Attendance / Commitment
- Lead sharing / Information sharing (WA loop)
- Promotion of each individual
- Team spirit
- Remaining competitive in proposals
- Non-competition
- Transparency

Together, for a low-carbon agriculture

Terms and conditions of membership

Prerequisites

- Be a supplier of products/services for animal production/plant production
- Have a proven impact on low-carbon agriculture
- Be an exporter
- Complete an application form

Terms and conditions

- Application assessed on pre-requisites (above) and non-competitiveness
- Once validated, annual membership fee of €1,500 excluding tax (which covers the costs of running the consortium and access to the benefits of the network)
